

PC: Installing and using your screensavers

Double-click the installer. When your screensaver is successfully installed, it becomes the active screensaver.

Removing Screensavers - PC

To delete a ScreenTime screensaver from the Display Properties control panel:

1. Run the Add/Remove Programs control panel.
2. Select the screensaver you want to delete.
3. Click Add/Remove.

MAC: Installing and using your screen savers

Double click the installer icon. A dialog box will appear when your screen saver is successfully installed. Press OK and the screen saver control panel will automatically open allowing you to view and adjust the settings of your new screensaver.

The installer icons for Mac OS X and Mac OS 8 & 9 are slightly different – allowing you to easily distinguish between them.

Removing Screen Savers - MAC

To remove an individual ScreenTime V2 screen saver module from the control panel menu:

Mac OS X

In the current Users folder > Library > Screen Savers, remove the folder with the name of the screensaver you want to delete.

Mac OS 8 & 9

In System > Preferences > Screen Savers, remove the folder with the name of the screensaver you want to delete.
